

# MEME BOMB COLLECTION

## Volume Aleph

*Compiled by Professor Cramulus*

Here are some tips for posting meme bombs:

- Hang signs at eye level on an angle which faces the flow of pedestrian traffic
- Signs posted in any area which has its own janitorial staff will be shortlived. For example, cleaning staff patrols malls regularly, so posts may disappear within a few hours. But the trees and columns outside of the mall are watched with far less scrutiny
- If a bathroom stall door opens towards the toilet, cleaning staff can't see the back side of the door when they clean. Stickers and signs placed slightly ABOVE eye level are often not noticed by cleaning staff focused on sweeping or mopping the floor.
- Bus stops and cross walks are excellent places for propaganda, as your audience is somewhat captive while they wait there. Boredom will sometimes prompt a person to read *anything*, no matter how inane.
